

# 2023 Product Catalogue

## OUR STORY

N Medical (N Med) is a leading healthcare wholesale supplier that aims to deliver the best quality hospital medical supplies to every end user in the world. Our company is engaged in the design, research & development, manufacturing, sales, and marketing of top quality medical consumable supplies, medical device, and equipment. We current supply various products to various end-users to the public and the private sectors.

N Medical emphasizes on the quality of our products. Since inception in 2015, we have already become one of the major suppliers for medical devices and medical consumable products to hospitals, government entities, and clinics.

N Medical actively focuses on the research and development of new medical products to meet the needs of end users. All of our products meet international hospital medical standards including ISO 13485, ISO 11135 / 37 for sterilized products, ISO 9001, EU CE. Many also meet US FDA, UK MHRA, and Australia TGA standards.

## OUR VISION

Our vision is to provide a seamless experience for our global distributors, partners, and hospitals by providing the highest quality medical products through optimized supply chains.

## OUR QUALITY

N Medical maintains control over the manufacturing of our products, from design, research & development, raw materials, manufacturing, to packaging, ensuring all products comply with stringent quality standards.

# Wound Dressing

## Basic Dressing Pack, Sterile

### Sterile. Convenient. All-in-one.

N Medical Sterile Basic Dressing Pack provide an all in one solution for basic wound care needs. The pack provide convenience to medical staff by packing a number of crucial items for wound dressing. The packs are customizable depending on user needs. All packs are sterilized by EO.

#### Items Available:

- Dressing Tray Large or Small
- Dressing Towel
- Surgical Drapes
- Non Woven Gauze Swabs
- Cotton Gauze Swabs
- Plastic Forceps
- Non Woven Balls
- Cotton Balls
- Other items available upon request

# Medical Apparel

## Medical Apparel

N Medical medical apparel product line covers a variety of surgical and medical apparel products, such as gowns, caps, shoe covers, as well as nitrile gloves, face shield, and face masks. All of the products are manufactured to international medical standards and complies with various test standards.

## Surgical Gown, Sterile

## Light Weight. Waterproof. Ultrasonic Seams.

N Medical Surgical Gowns are constructed using state of the art materials and technology. Suitable for isolation and basic protection from bacteria and particulate.

### Specification

- SMMS Non-Woven fabrics 45 gsm
- ANSI/AAMI PB70 Level 2
- Ultrasonic welding
- Latex free
- White knitted elastic cuff
- Velcro neckline, extra long ties
- Class one flammability rating
- Includes 2 low-linting absorbent hand towel, 1 wrapper

### Manufacturing Features

The gowns are manufactured with a unique non-woven fabric based on the latest Spunbonded / Melt blown / Melt blown / Spunbonded (SMMS) technology. This popular and very affordable gown also has very low lint that is fluid and bacteria resistant. The seams are ultrasonically sealed to prevent strike through where the sleeves are joined to the body of the gown.

### Design Features

The gowns are designed with generous size and length, for extra comfort and protection. The neckline features a Velcro-style closure that easily adjust to suit different neck sizes to prevent gapping in the front of the gown, giving extra protection against fluids.

### Certifications

EN 13795-1 Standard, EN ISO 22612, EN ISO 22610, EN ISO 11737-1, EN ISO 9073-10, EN ISO 811, EN ISO 13938-1, EN ISO 29073-3, AAMI PB70:2012 Standard, AATCC 42, AATCC 127, CE, ISO13485, FDA

## SMMS Isolation Gown

## Light Weight. Breathable. Ultrasonic Seams.

N Medical SMMS Isolation Gowns are constructed using state of the art materials and technology. Suitable for isolation and basic protection from bacteria and particulate.

### Specification

- SMMS Non-Woven fabrics 25 gsm
- ANSI/AAMI PB70 Level 2 or Level 3
- Ultrasonic welding
- Latex free
- White knitted elastic cuff
- Velcro neckline, extra long ties
- Class one flammability rating

### Manufacturing Features

The gowns are manufactured with a unique non-woven fabric based on the latest Spunbonded / Melt blown / Melt blown / Spunbonded (SMMS) technology. This popular and very affordable gown also has very low lint that is fluid and bacteria resistant. The seams are ultrasonically sealed to prevent strike through where the sleeves are joined to the body of the gown.

### Design Features

The gowns are designed with generous size and length, for extra comfort and protection. The neckline features a Velcro-style closure that easily adjust to suit different neck sizes to prevent gapping in the front of the gown, giving extra protection against fluids.

### Certifications

## Waterproof Isolation Gown

## Light Weight. Waterproof. Comfortable Fit.

N Medical Waterproof Isolation Gowns are constructed using state of the art materials, suitable for isolation and basic protection from bacteria and particulate.

### Specification

- PP+PE fabric 30 gsm
- ANSI/AAMI PB70 Level 1
- Waterproof
- Latex free
- High density machine stitched seams
- White knitted elastic cuff
- Velcro neckline
- Extra long ties

### Manufacturing Features

The gowns are manufactured from polypropylene material and coated in polyethylene (PP+PE). These gowns offer enhanced fluid resistance and protection. The seams are joined together with high density machine stitching.

### Design Features

The gowns are designed with generous size and length, for extra comfort and protection. The neckline features a Velcro-style closure that easily adjust to suit different neck sizes to prevent gapping in the front of the gown, giving extra protection against fluids.

### Certifications

AAMI PB70:2012 Standard, AATCC 42, AATCC 127, CE, ISO13485, FDA

## Non Woven Elastic Cap

### Low Lint. Breathable. Comfortable Fit.

N Medical Medical Non Woven Caps are made of high quality low lint non-woven fabric. The caps are a necessary piece of personal protective clothing for any clinic, hospital, laboratory or exam room. These head covers cover medical professionals’ and patients’ hair, maintaining proper hygiene safety. The caps are made of breathable spunbonded polypropylene and ensure maximum comfort. Each cap has an 3mm wide elastic band to keep the cap securely in place without sliding. The caps can be packaged as Bouffant Caps or Strip Caps as desired.

# Medical Face Masks

## SureMask™ Adult Medical Face Mask

### 4 Fold 3D Design. Extra Breathable. Silky Hypoallergenic Materials.

N Medical SureMasks™ are medical grade surgical face masks made to maximise comfort with the highest level protection. The mask is made of 3 layers of non woven materials, with the inner layer made of silky-smooth and breathable non woven material to ensure all day wear comfort. The face mask has a unique 4-fold up-down 3D design to create extra space between the wearer's nose and the face mask, further reduces irritations. SureMask is effective protection against virus, germs, dust, blood, and particles. Every batch of masks are also sterilized through Ethylene Oxide (EO) in their final packaging to ensure cleanliness and minimal bacteria.

## SureMask™ Medical Respirator

### 4 Fold 3D Design. Extra Breathable. Silky Hypoallergenic Materials.

N Medical 3D Respirator Face Masks are 4 or 5 layers respirators designed for medical use. The all new 3D design provides a better wearing experience compares to traditional KN95 with better contouring around wear's face. They are also more effective in protecting wears against smaller bacteria particles compared to traditional surgical masks.

The inner layer of the face mask respirator is made of low lint materials to reduce sensitivity to skin and nose. The respirators' filters are designed to have a high filtration capacity whilst retaining low breathing resistance, allowing for easy and comfortable breathing for prolonged periods of time. The flexible ear loop is made with extra stretchable elastic to provide extra comfort for all day wear.

## Dental Bibs

### 3 Ply. Absorbent. Soft.

N Medical Dental Bibs are 3 Ply Disposable Paper Bib composed of 1 Ply Polyethylene film backing and 2 Ply Tissue. The 2 ply water absorbent tissue will help in absorbing liquid and avoiding spills, while the poly-back sheet provides optimal liquid barrier. The waterproof bibs feel soft to the touch, yet are made strong to prevent from tearing easily.

These bibs are large enough to use on a variety of patients. Measuring 33 cm x 45 cm, they cover a large enough surface area that they can be used on kids and adults alike. They effectively cover the patient's chest and neck area without being uncomfortable or leaving large areas exposed. The bibs can also be used as changing table liner for newborns, a waterproof underpad for mattress and cribs, tattoo artists, tray cover, lap cloth and table covers.
